

Subject: Letter of Recommendation for Badreddine MALIH

HELIUP
830 Chemin de la Plaisse
73370 Le Bourget du Lac, France

In Le Bourget du Lac, November 22, 2024

To Whom It May Concern,

I am delighted to recommend Badreddine MALIH for an end-of-study internship. As the Chief Technical Officer and Co-Founder of HELIUP, I had the opportunity to work closely with Badreddine during his internship with our team from March 11, 2024, to June 14, 2024. During this time, he demonstrated exceptional professionalism and strong motivation.

Throughout his internship, Badreddine quickly adapted to our work environment and exhibited remarkable problem-solving skills when faced with challenges. He contributed to several important projects, including the characterization of various types of glass and the development of a specific test aimed at improving the mechanical durability of lightweight photovoltaic panels. He approached these tasks with great rigor and a proactive attitude.

The skills Badreddine displayed, both technical and interpersonal, are significant assets that make him well-suited for an international internship. His ability to work collaboratively, take initiative, and communicate effectively with colleagues were key to his success with us.

Moreover, Badreddine possesses a strong curiosity and a genuine desire to learn, qualities that I am confident will enable him to adapt quickly to an international work environment and make a positive contribution to the hosting company. He has also demonstrated excellent time management and task prioritization abilities, which will be invaluable for thriving in a global context.

I am convinced that Badreddine will make the most of this international experience to deepen his professional skills while broadening his perspective on the workplace. I wish him great success and am certain he will be a valuable asset to any organization that offers him this opportunity.

Please consider this letter as a strong recommendation for Badreddine MALIH for an international internship. Do not hesitate to contact me should you require additional information.

Sincerely,
Julien GAUME, PhD
